PRECAUTIONARY STATEMENTS

CAUTION: Keep out of reach of children. Harmful if swallowed.

STORAGE AND DISPOSAL: Keep product in original container. Do not transfer into food or drink containers. Triple rinse when empty for disposal. Always dispose of container in accordance with local, state, and/or federal regulations.

CONDITIONS OF SALE: The information contained herein is believed to be accurate and reliable. Buyer and user acknowledge and assume all liability resulting from use of this material. Follow directions carefully. Timing, rate, and method of application, weather and crop conditions, mixtures with chemicals not specifically recommended on this label or any accompanying written recommendations are beyond the control of Seller. Buyer assumes all risks of use, storage and handling of this material not in accordance with directions given herewith. Information received by the Washington State Department of Agriculture regarding the components in this product is available on the internet at <http://agr.wa.gov>.

COMPATIBILITY: May be mixed with water to improve application coverage. Can be mixed with most fertilizers. Use clean spray equipment. Agitate as needed. Perform a jar test before mixing large quantities if compatibility is in question.

DESCRIPTION

RootMax is a probiotic blend of organic acids, growth stimulants, enzymes, bacteria, trace minerals, selective bacilli, and vitamins formulated for faster, more uniform seed germination and seedling health and vigor.

BENEFITS OF USE

- Improves percentage of germination
- Promotes rapid early germination, root growth and development
- Facilitates early emergence and healthier seedling growth and survival
- Reduces seedling disease
- Establishes healthy rhizosphere

APPLICATION RECOMMENDATIONS Shake Well Before Using

For **SEED PLANTING:**

..... Apply 6 to 8 ounces per acre

For **TRANSPLANTING:**

..... For Small Plants—Add to transplant water 6 to 8 ounces per acre

.... For Trees—Add to transplant water 16 to 32 ounces per acre

WARNING: Application of this material in excess may result in forage crops containing levels of Molybdenum (Mo) which are toxic to ruminant animals.

Application rates and timing may vary according to individual crop needs, prior fertilizer applications, and soil type and conditions. Applications should be made in cooperation with a MAP representative or other agricultural specialist.
